

**Let us see if you can remember the steps to code a second CLLE program.** Write a program that will do the following:

1. Let you see all the objects in **your** library
2. Show messages from system related activities (like compiling)
3. Look at all your spooled files. Be prepared to show both your programs to an instructor.
4. Sign off by entering **SIGNOFF** on any command line.

```
Work with Objects Using PDM                                S7850740

Library . . . . . DM433D01      Position to . . . . . 
                                Position to type . . . . . 

Type options, press Enter.
